

IN THE SPECIFICATION

Page 1, lines 25-26 have been amended as follows:

Figure 1 illustrates a form of the convenience roll in accordance with the invention,

Page 2, lines 4-5 have been amended as follows:

Figures 5 and 6 illustrate alternative forms of the convenience roll according to the invention,

Page 2, line 16 has been amended as follows:

Figures 13 to 18 illustrate various forms of the dispenser, and

Page 2, line 18 has been amended as follows:

Figure 19 illustrates an alternative form of the convenience roll.

Page 5, lines 1-8 have been amended as follows:

Figures 5 and 6 illustrate possible alternative profiles for the shape of the individual portions of the web. In Figure 5, the individual portions 11a of the web 10a have an oval shape, whilst in Figure ~~[[5]]~~ 6 the individual portions 11b of the web 10b are diamond-shaped. In each case, the individual portions 11a and 11b are joined integrally together in series by frangible strips 12a, 12b, as in the manner of the Figure 1 embodiment. If desired, the webs 10a, 10b shown in Figures 5 and 6 could be folded in ways similar to those discussed above in relation to the Figure 1 embodiment.

Page 6, lines 13-14 have been amended as follows:

The Figure 16 dispenser 160 is free standing, with two separate stacks 13 of paper towels ~~[[13]]~~ being spring loaded towards a central access opening 161.

Page 6, lines 16-19 have been amended as follows:

The Figure 17 dispenser 170 is in the form of a rotatable, part-spherical drum shaped to receive a stack 13 of towels around its axis, for dispensing through a slot 171. This dispenser is suitable for containing supplies of paper towels in the form of the stack 13 shown in Figure 3.

Page 6, lines 21-23 have been amended as follows:

In the Figure 18 dispenser 180, a stack **13** of paper towels is stored in a generally annular shaped housing, with the paper towels being biased towards an access opening 181 by ~~means of~~ a spring-loaded paddle 182.

Page 7, lines 4-8 have been amended as follows:

Figure 19 shows an alternative form of the convenience roll, here a stack 190 of disposable bibs. Each individual portion 191 of the web is a disposable bib and as before, these are all connected together by a series of frangible strips. The individual portions 191 here have a central access hole 192 so that the bib can be put over a baby's head, as illustrated.
